

HLTAID009 Provide Cardiopulmonary Resuscitation

This course covers the skills and knowledge required to provide Cardiopulmonary Resuscitation (CPR) to the Australian Resuscitation Council Guidelines. It will provide you with an understanding of how to follow the cycle of care until more advanced medical care arrives.

Course Delivery and Duration

We provide a Learner's Manual along with mandatory pre-course study requirements. This study reduces the face-to-face training which you should allow 2.5 hours for completion. The course is delivered in English and requires students to be competent communicating in English (written and verbal).

Course Content

- Respond to signs of an unconscious casualty
- Legal and cultural responsibilities
- Management of unresponsive casualty
- Airway management
- Cardiopulmonary Resuscitation (CPR)
- Complications with resuscitation
- Cross infection
- Operate an Automated External Defibrillator (AED)
- Debriefing and welfare

Certification

A PDF certificate with email security will be emailed to your email address upon successful completion of all training, assessment, and administrative requirements.
